Why an SDG Atlas?

How are the SDGs Monitored?

- Inter-agency and Expert Group on SDG Indicators (IEAG-SDGs)
- Develops global indicator framework
- Includes member states; regional and international agencies are observers

The Bank's SDG Indicators Group

- Members from across the Bank's thematic global practices providing technical input to all 17 goals
- Bank responsible for reporting on 20 indicators covering 9 goals and involved in another 20+.
- All work closely aligned with the Bank's own Twin Goals

No	Indicator	Name	Bank Unit	Tier
1	1.1.1	\$1.90 poverty	Poverty GP, DECPI, DECDG	1
2	1.2.1	Monetary poverty, national	Poverty GP	2
3	1.2.2	Multidimensional poverty, national	Poverty GP, DECPI	2
4	1.3.1	Social Protection Coverage	SPL GP	1
5	1.4.2	Land tenure security	DECAR	2
6	3.8.2	Universal Health Care	HNP & DECHD	2
7	5.1.1	Legal framework for Gender equality	DECIG	2
8	7.1.1	Electricity access	Energy GP	1
9	8.10.2	Access to Finance	DECFP	1
10	9.1.1	Rural road access	Transport & ICT GP	3
11	9.3.2	Small-scale industries with loan / credit line	DECIG	2
12	10.1.1	Growth of B40 vs average	Poverty GP	2
13	10.2.1	People under 50% median income	Poverty GP, DECDG	3
14	10.7.1	Recruitment costs	SPL GP	3
15	10.c.1	Remittance costs	Finance and Markets GP	2
16	16.5.2	Bribery	DECIG	2
17	16.6.1	Actual versus approved budget	Governance GP	1
18	17.3.2	Remittance volume / total GDP	DECDG	1
19	17.4.1	Debt service / exports of goods and services	DECDG	1
20	17.13.1	Marcoeconomic Dashboard	DECDG	3
21	17.17.1	Amount of Public Pvt Partnership	GTIAK	2

Atlas of Sustainable Development Goals

2018

From World Development Indicators

The Atlas of Sustainable Development Goals 2018 presents maps, charts, and stories related to the [17 Sustainable Development Goals](#). It discusses trends, comparisons, and measurement issues using accessible and shareable data visualizations.

The data draw on the [World Development Indicators](#) the World Bank's compilation of internationally comparable statistics about global development and the quality of people's lives. For each of the SDGs, relevant indicators have been chosen to illustrate important ideas.

This contents of this publication [are available as a PDF](#), the data are available in the [World Bank's Data Catalog](#) and the code used to generate the majority of figures are [available on Github](#). The 2017 edition of the Atlas of Sustainable Development Goals can be found [here](#).

60     note = "Note: Estimates not available for Europe & Central Asia due to poor data coverage.",
```

Young children and infants are most vulnerable to the effects of malnutrition. Globally, over 95 million fewer children were stunted in 2016 than in 1990.

Number of children under age 5 that are stunted, height for age (millions)

Note: Estimates not available for Europe & Central Asia due to poor data coverage.

Source: UNICEF, WHO and World Bank. WDI (SH.STA.STNT.ZS); Health Nutrition and Population Statistics (SP.POP.0004.FE; SP.POP.0004.MA).

What does it contain?

People living in extreme poverty,

Women average 2.6 times as much time on unpaid care and domestic work as men do.

Proportion of time spent on unpaid care and domestic work, most recent value in 2007–15 (% of 24 hour day)

SDG 5.4

Note: 2.6 times estimate from UN Women (2018) <http://www.unwomen.org/en/digital-library/sdg-report>. Data may not be strictly comparable across countries as the method and sampling used for data collection may differ.

Source: UN Statistics Division. World Development Indicators (SG.TIM.UWRK.MA; SG.TIM.UWRK.FE).

India still has the largest number of people practicing open defecation.

People practicing open defecation (millions)

SDG 6.2

Note: North America is zero over the entire period; Europe & Central Asia is zero from 2013.

Source: WHO/UNICEF Joint Monitoring Programme for Water Supply, Sanitation and Hygiene. WDI (SH.STA.ODFC.ZS; SP.POP.TOTL).

Drinking water is essential to life, but only 71 percent of people have water that is considered safely managed.

Access to water at different categories, 2015 (% of global population)

SDG 6.1

Safely managed
water is the highest level of service. It requires an improved water source, located on premises, available when needed, and free from contamination.

Together, safely managed and basic water are referred to as at least basic water

Basic water is still improved but availability and freedom from contamination are not guaranteed, and it need not be on premises, but must be within a 30-minute roundtrip.

Limited water is water from an improved source with a roundtrip collection time of more than 30 minutes.

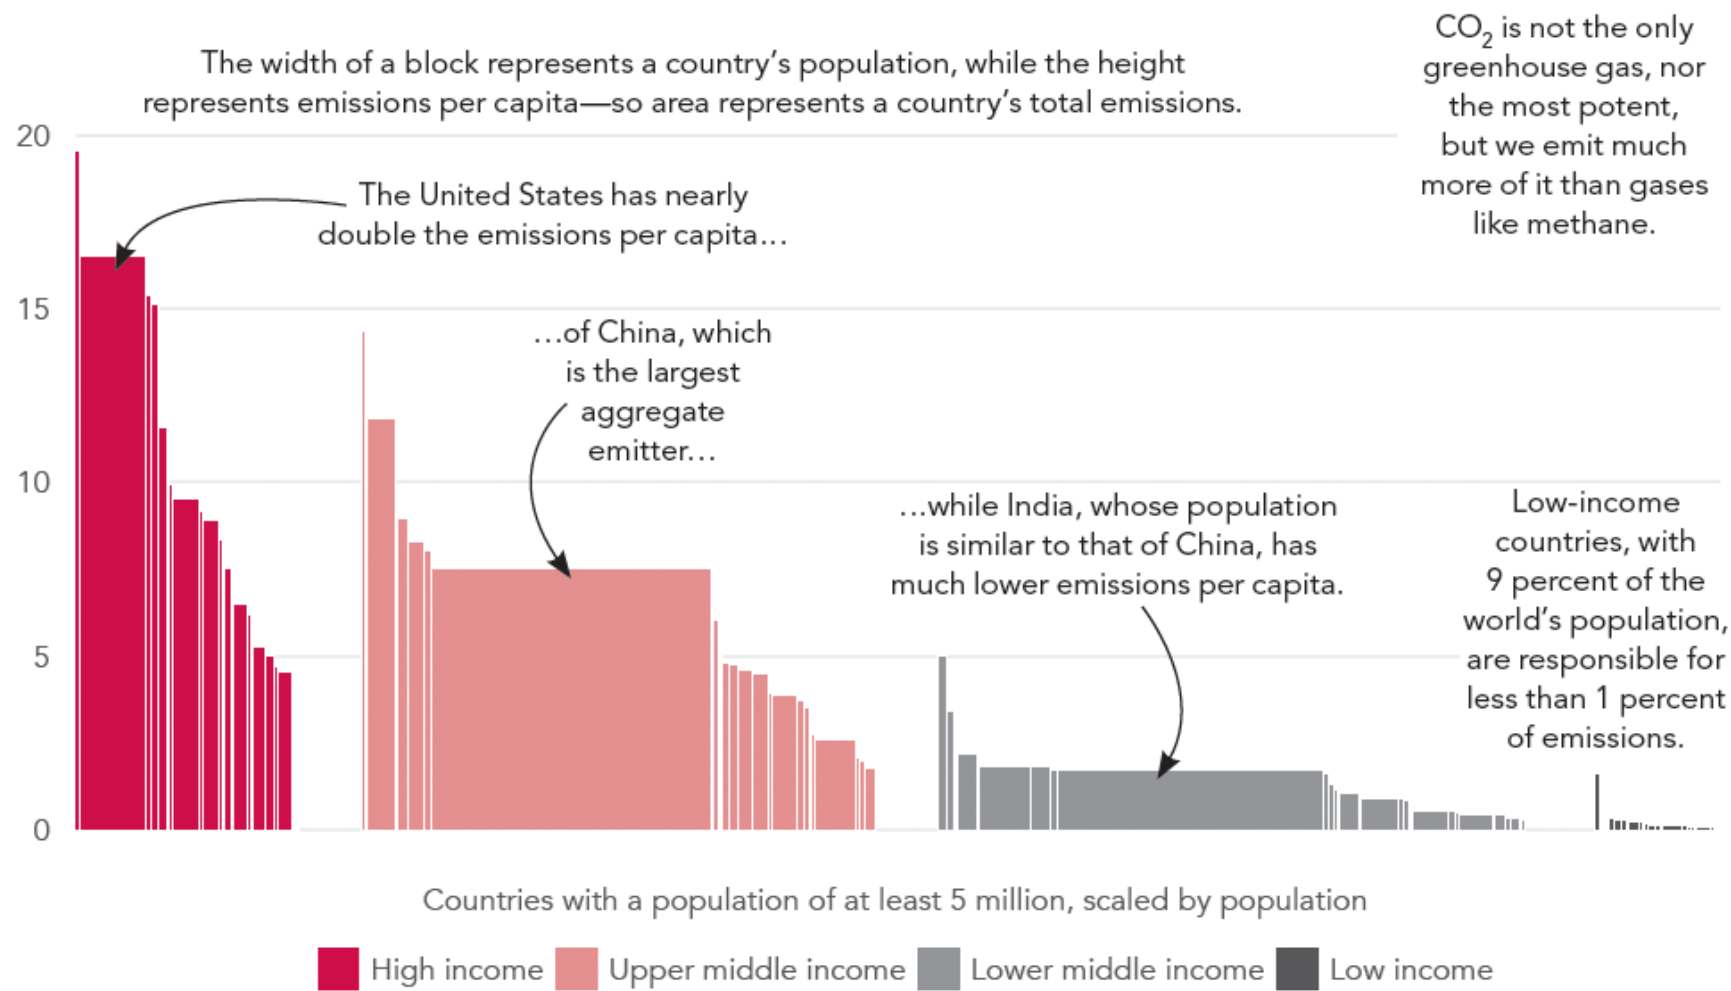

Unimproved sources have little or no protection from contamination.

Surface water
(such as rivers)

Climate change is caused by this atmospheric CO₂ and other greenhouse gases. Emissions per capita vary across and within income groups.

CO₂ emissions, by country and income group, 2014 (metric tons per capita)

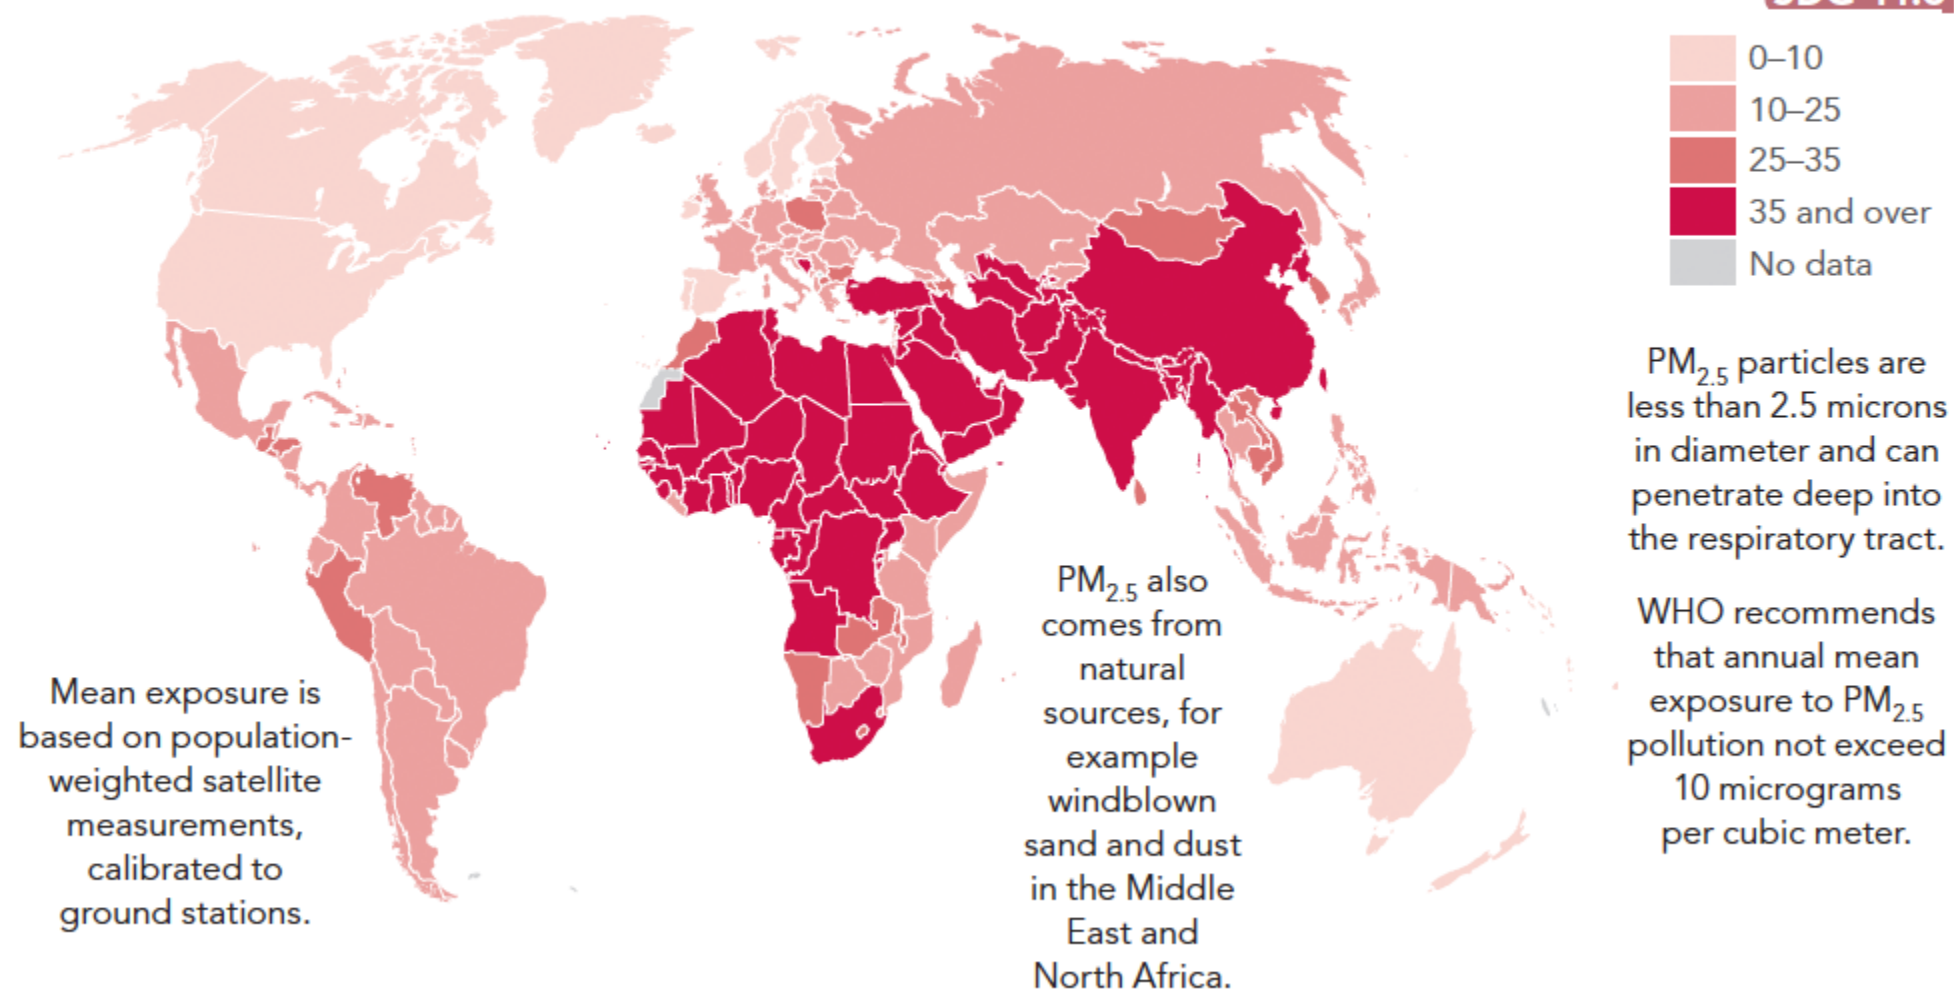

Source: Carbon Dioxide Information Analysis Center. World Development Indicators (EN.ATM.CO2E.KT; SP.POP.TOTL).

Most countries exceed safe levels of fine particulate matter (PM_{2.5}) pollution. Industry, transport, and household uses of solid fuels are among the sources.

Ambient air pollution, PM_{2.5}, annual mean exposure, 2016 (micrograms per cubic meter, µg/m³)

SDG 11.6

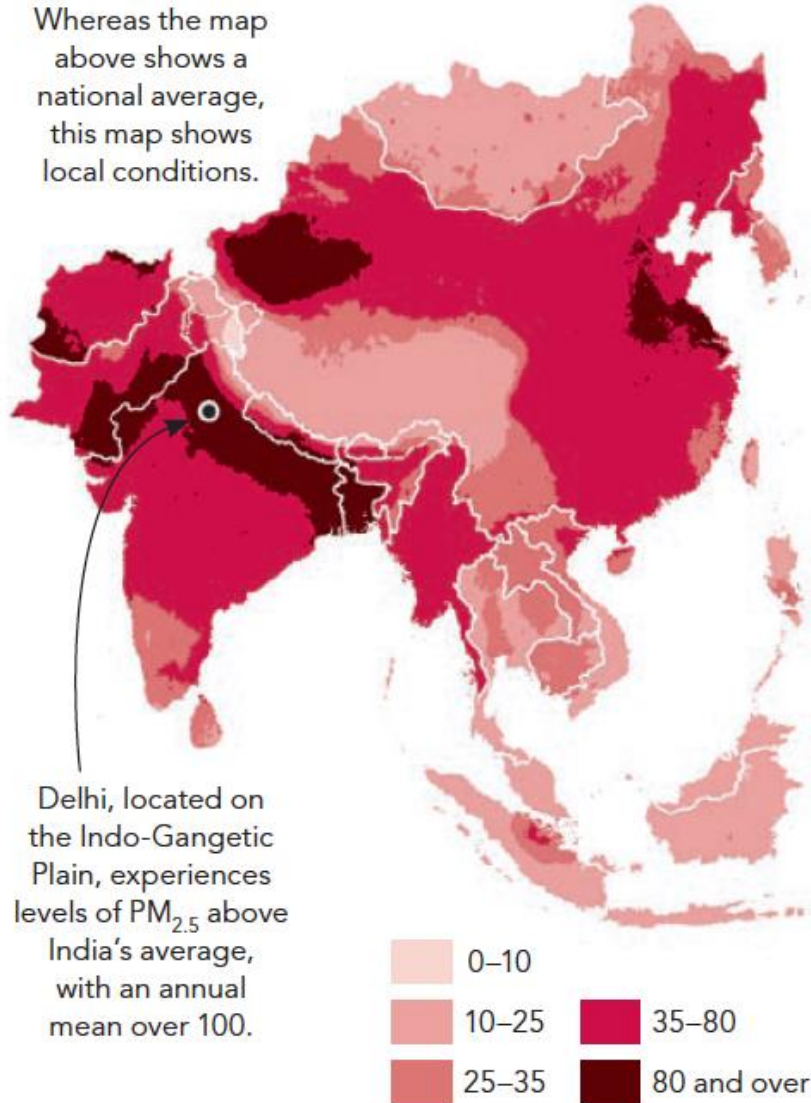

Source: van Donkelaar and others 2016. World Development Indicators (EN.ATM.PM25.MC.M3).

But PM_{2.5} measurements show local variation from the national means.

PM_{2.5}, gridded by 0.1 degree, 2016 (μg/m³)

Whereas the map above shows a national average, this map shows local conditions.

Source: van Donkelaar and others 2016. <http://doi.org/10.1021/acs.est.5b05833>

And even in a specific location, PM_{2.5} varies with seasons and weather.

PM_{2.5}, daily mean, DTU^a Delhi, 2017 (μg/m³)

a. Sampled at Delhi Technological University (DTU).

Industrial fishing takes place in more than half the world's ocean area, about four times the area of land-based agriculture.

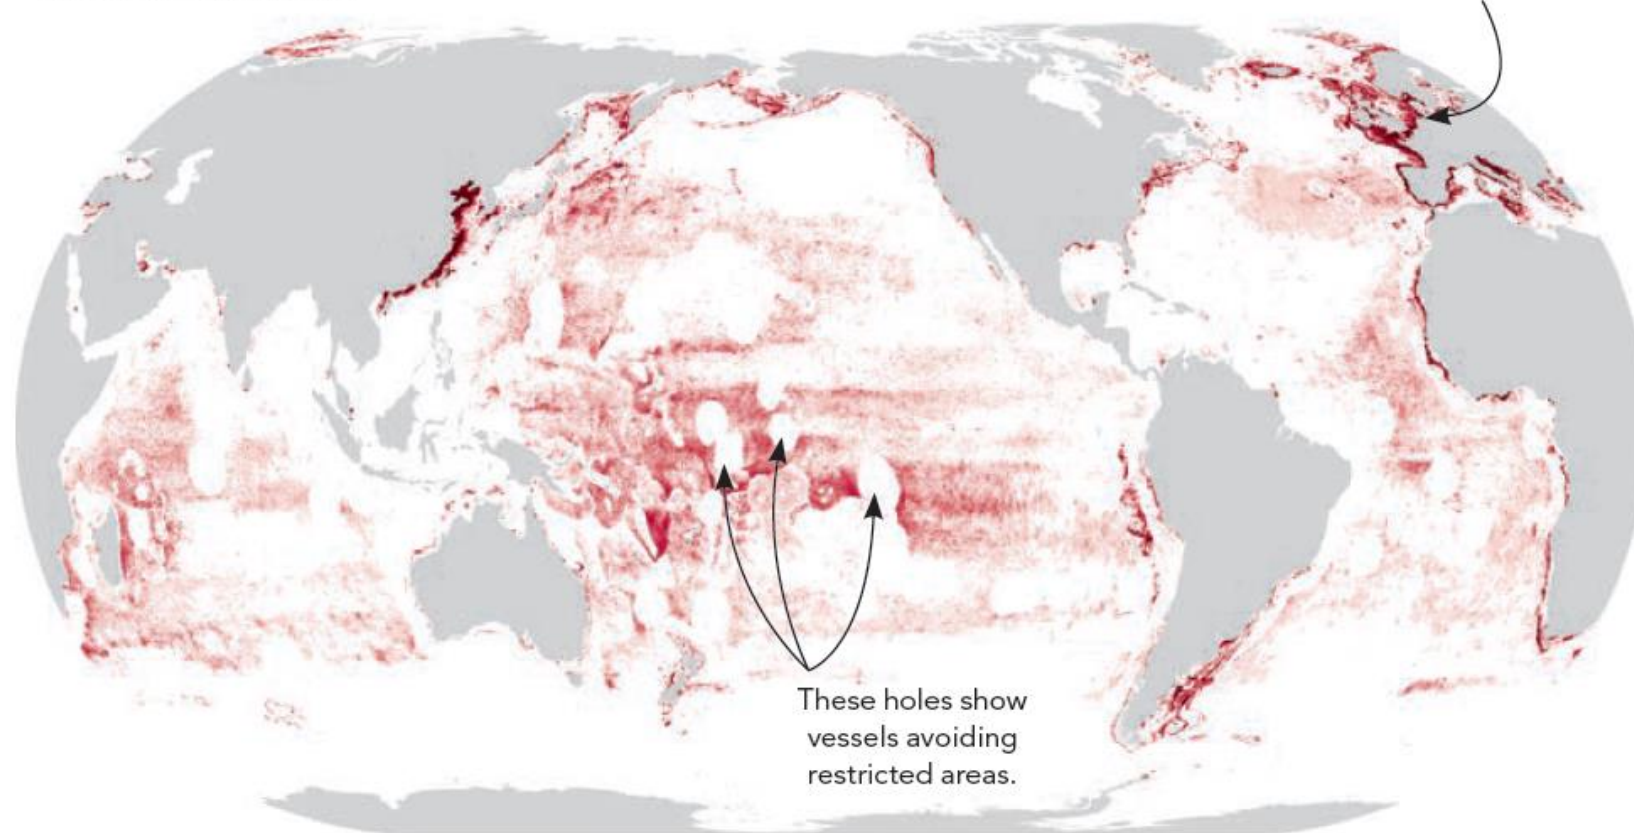

Vessel-hours of fishing activity, 2016 (per sq. km)

SDG 14.4

This recently published dataset uses radio transmissions, emitted for collision avoidance, to track fishing vessels. It excludes small vessels and, probably, illegal fishing.

Each square kilometer of the most heavily fished regions of Europe and East Asia had activity equivalent to more than 10 percent of the 8,760 hours in a year.

Featured Stories

The feature stories highlight key development data issues. The WDI helps data users find information related to all aspects of development, both historical and current, and to follow trends and monitor progress towards a myriad of goals and targets. The database is compiled from officially-recognized sources and includes national, regional, and global estimates.
