

US Financial Data

THE WEEK'S HIGHLIGHTS:

- *According to the revised estimate published in the preliminary report, real GDP grew at a 2.4 percent annual rate during the third quarter, down 0.3 percentage points from the advance estimate. Upward revisions to nonresidential (business) fixed investment and to government consumption and gross investment were more than offset by downward revisions to residential fixed investment, net exports and nonfarm inventory investment. With growth of nominal GDP revised down 0.4 percentage points to 4.4 percent, growth of the GDP price index, accordingly, was lowered 0.1 percentage point to 1.9 percent.*
- *After rising \$70.4 billion during the first half of the year, corporate profits, as measured in the national income accounts, rose \$7.6 billion during the third quarter. Corporate profits are not adjusted for price changes, but are adjusted for inventory valuation changes and capital consumption charges.*
- *Real personal consumption expenditures (PCE) rose \$0.5 billion, a 0.1 percent annual rate, in October, which was the smallest gain since July 1998. Consumer spending in October was held back by a \$20 billion decline in purchases of durable goods, the largest percentage drop in 17 months. The PCE chain price index rose at a 2 percent annual rate in October; it has risen at a 2.7 percent rate year-to-date.*
- *After rising a combined \$11.2 billion in August and September, new orders for manufactured durable goods declined \$12.1 billion in October. New orders for durable goods are up 3.2 percent from a year earlier.*

All data are seasonally adjusted unless otherwise indicated.

U.S. Financial Data is published weekly by the Research Division of the Federal Reserve Bank of St. Louis. For more information on data, please call (314) 444-8590. To be added to the mailing list, please call (314) 444-8808 or (314) 444-8809.

Information in this publication is also included in the Federal Reserve Economic Data (FRED) electronic bulletin board at (314) 621-1824 or internet World Wide Web server at www.stls.frb.org/fred.

Adjusted Monetary Base

Averages of Daily Figures
Seasonally Adjusted

The adjusted monetary base is the sum of Federal Reserve deposits and vault cash held by domestic depository institutions, currency held by the public, and an adjustment for the effect of changes in reserve requirement ratios. The monetary base series includes Federal Reserve deposits used to satisfy clearing balance contracts. Data are computed by this bank. A detailed description of the adjusted monetary base is available from this bank. Recent data are preliminary.
