

## Overpayments due to Fraud by Category

Percent of Overpayments due to Fraud

NOTE: BAM lists 28 possible categories of fraud. To calculate the numbers in the chart, we first sum up the dollar amounts of overpayments due to all 28 types of fraud. Then, for each of the three categories of fraud in the chart, we calculate the total dollar amount of overpayments from the category. The numbers reported in the chart are the latter amount divided by the former.
